pdf - Earth is the third planet
from the Sun and the only object
in the Universe known to harbor
life. According to radiometric
dating and other sources of
evidence, Earth formed over 4.5
billion years ago. Earth's gravity
interacts with other objects in
space, especially the Sun and the
Moon, Earth's only natural
satellite. Earth revolves around the
Sun in 365.26 days, a period
known as an Earth year. Tue, 12

Wikipedia - Nature, in the
broadest sense, is the natural,
physical, or material world or
universe. "Nature" can refer to the
phenomena of the physical world,
and also to life in general. The
study of nature is a large, if not
the only, part of science. Although
humans are part of nature, human
activity is often understood as a
separate category from other
natural phenomena. Sat, 16 Jun

- I don't think western
environmentalists are paid by the
coal interests. The coal interests
don't have enough money.
What we see in typical
prescriptions from commercial
